Navigating

Your Digital

Ocean

Who We Are

Seamaks is a Maritime IT and Satellite Communication specialist headquartered in Noida, India, delivering mission-critical technology solutions to fleets navigating the world's oceans.

We provide comprehensive, end-to-end maritime technology services—from robust onboard IT infrastructure management to cutting-edge satellite communication systems—ensuring your vessels remain connected, secure, and fully operational around the clock.

Our solutions are purpose-built for the demanding maritime environment, seamlessly integrating advanced technology, stringent cybersecurity protocols, and real-time operational visibility into a unified digital ecosystem.

With **24/7/365 support** and a deep understanding of maritime operations, Seamaks serves as your trusted technology partner—keeping your fleet digitally empowered wherever your voyages take you.

Satellite Communication Solutions

We empower maritime fleets with reliable, high-performance satellite connectivity solutions engineered for uninterrupted global operations:

Starlink Maritime

High-speed, low-latency connectivity leveraging advanced LEO satellite technology

OneWeb

Reliable global coverage for mission-critical vessel operations

VSAT & LTE Hybrid

Intelligent hybrid systems for seamless coastal-to-oceanic transitions

Backup Terminals

Redundant failover configuration ensuring continuous connectivity

Expert-Engineered Communication Racks

Each deployment includes custom-designed communication racks—meticulously built and configured by our satellite specialists to deliver redundancy, reliability, and seamless integration with your vessel's existing systems.

Unified Management Dashboard

Monitor your entire satellite communication network from **one intelligent dashboard**: real-time bandwidth utilization, latency metrics, data consumption, firewall configurations, and network health—all at your fingertips.

Fleet IT & Infrastructure Management

Your vessel's IT environment is the operational heart of modern maritime operations—and we ensure it beats securely, efficiently, and without interruption.

Infrastructure Management

Comprehensive onboard and remote IT infrastructure oversight ensuring optimal performance

Server & Workstation Administration

Professional management of critical systems, ensuring uptime and reliability

Network Monitoring & Optimization

Continuous network surveillance with proactive performance enhancement

Endpoint Protection

Advanced cybersecurity compliance across all connected devices

Data Backup & Restoration

Secure, automated backup systems with rapid recovery capabilities

Hardware Lifecycle Management

End-to-end supply, configuration, deployment, and replacement services

Using **maritime-specific management tools**, Seamaks provides continuous visibility, centralized control, and regulatory compliance across your entire fleet—no matter where your vessels operate.

Maritime Cybersecurity

Security is Non-Negotiable

In today's connected maritime environment, ships are as digital as they are mechanical. Seamaks delivers compliance-driven cybersecurity services purpose-built for the unique challenges of the maritime domain.

01

Threat Detection & Prevention

Real-time intrusion detection systems identifying and neutralizing threats before they impact operations

02

Firewall Configuration & Monitoring

Continuous firewall management ensuring secure network perimeters

03

Endpoint Protection & Vulnerability Management

Comprehensive device security with regular vulnerability assessments

04

Compliance Audits

Cyber audits aligned with IMO regulations and international maritime standards

05

Crew Training Programs

Security awareness initiatives empowering your crew with best practices

 We protect your fleet's digital ecosystem comprehensively—enabling you to operate safely, securely, and confidently across global waters.

Strategic IT Consulting & Digital Transformation

Beyond operational service delivery, Seamaks functions as your strategic technology partner—guiding you through the complexities of maritime digitalization and fleet modernization.

IT Roadmaps & Modernization

Comprehensive technology strategy development aligned with operational objectives

Cost Optimization

Strategic technology investments delivering measurable ROI and operational efficiency

Fleet Digitalization Consulting

End-to-end guidance on digital transformation initiatives and technology adoption

Vendor & Solution Evaluation

Independent assessment of technology providers and solution capabilities

Project Management & Onboarding

Seamless implementation support from planning through full operational deployment

Our maritime IT consultants bring decades of combined industry experience, ensuring your technology investments are strategically aligned with long-term operational goals and business outcomes.

The Seamaks Advantage

Maritime-Built Expertise

Every solution designed specifically for maritime environments—rugged, reliable, compliant, and battle-tested at sea

Trusted Partner Ecosystem

Collaborating with industry-leading technology providers including Starlink, OneWeb, ESET, and other maritime-grade vendors

End-to-End Visibility

Complete fleet oversight from onboard devices to global connectivity—unified through one intelligent management platform

Global Coverage

Supporting vessels operating anywhere worldwide—from coastal routes to deep-sea voyages across all maritime regions

Always-On Support

24/7/365 network monitoring and technical support delivered from our dedicated maritime operations centre
